Divestco offers cost effective seismic interpretation workstations and fully supported secure data rooms, located at a convenient and secure downtown location.

Purchasing expensive plotters and interpretation workstations for consultants and startup companies may not always be feasible. Divestco workstations are outfitted with state-of-the-art hardware, software and colour plotting printers. All data is heavily scrutinized for accuracy prior to your arrival ensuring that your time on the workstation is as cost effective as possible.

Benefits

- Secure system with backup systems located off site
- No hardware and software maintenance required
- Extensive and complete data preparation
- Cost effective – hourly weekly and monthly rates available
- Private rooms for confidential seismic data viewing and reviews

Available Software:

- GeoCarta
- WinPICs
- CrossLog Suite
- GeoVista
- EnerGISite
- MapQ
- Synthetic Suite
- Other Industry Applications

Divestco workstations are outfitted with state-of-the-art hardware, software and colour plotting printers.
