

eBroker™

Online Seismic Data Request & Management Tool

Divestco's web-based browser eBroker™ offers the ability to browse and request seismic information directly from your desktop. Easily create a seismic project, and select lines of interest.

Your broker instantly receives an email showing your requested lines and can immediately begin obtaining approvals and gathering QI prints. You save the time typically required to request seismic, and because eBroker™ automatically saves your projects you can check on the status of line availability at your convenience and determine when it would be appropriate to QI. eBroker™ shows complimentary datasets such as wells, land sales, gravity & magnetic, lidar and micro-seismic.

The eBroker Advantage

BENEFITS

- Pick the lines you want to QI yourself! Save time by avoiding clumsy maps and poor quality data.
- Always know the status of your requests and availability of data.
- Backed by the largest team of seismic brokers in Canada.

NEW FEATURES

- Upload custom shapefiles, allowing you to import proprietary seismic or land layers.
- Browse seismic at your leisure with 24/7 availability, now accessible on your favorite tablet or smartphone.
- Gravity & Magnetic, Lidar and Micro-Seismic now available.
