

# Scanned Well Documents

EnerGISite

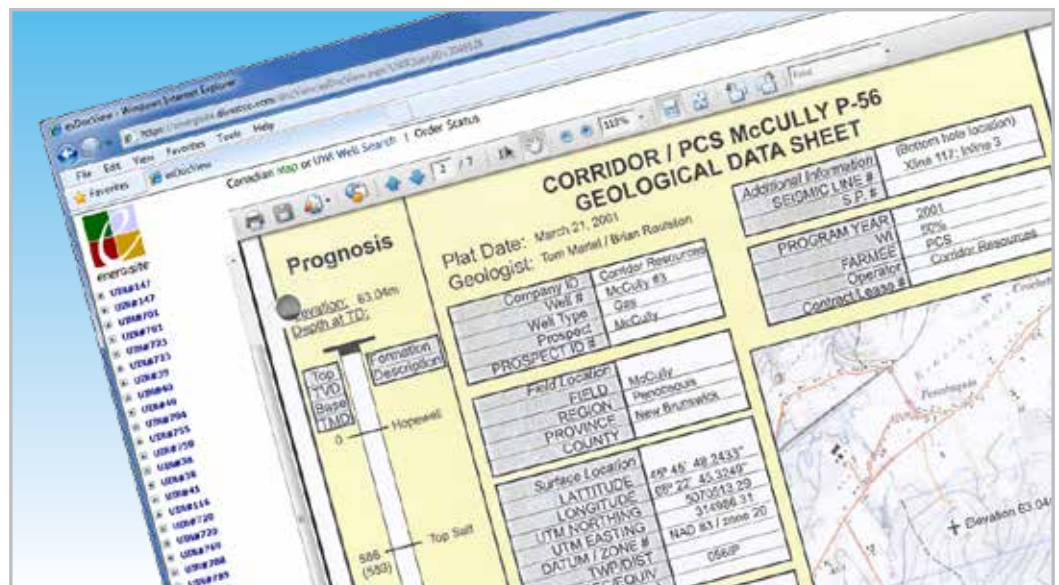

**The Original Scanned Well Documents Instantly Available through EnerGISite**

## EnerGISite Scanned Well Documents

Divestco's extensive online database of scanned Canadian well documents is available directly through EnerGISite. The database is available by subscription and consists of over 2.3 million scanned pages with extensive coverage of DST Reports, Directional Surveys, Fluid Analysis and over 30 other types of detailed well documents.

The scanned reports can be viewed instantly as PDF documents directly through the EnerGISite eDocView web application or through Divestco's GeoVista and GeoCarta software and data packages.

Access to the complete original source documents provides you with a degree of detail that is rarely available in digital well databases and will bring you the confidence you need when making critical data influenced decisions.
