

# Starting an **exploration** company?

## Paying too much for software?

Divestco's Exploration Bundle: All the Software & Data you need, as low as **\$25K\*/year**

### The Exploration Bundle - Easy as 1,2,3!

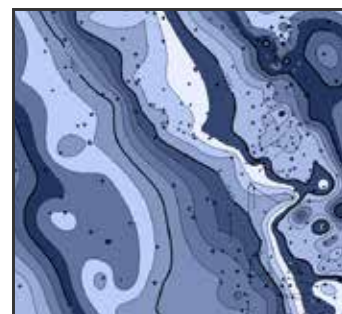

#### 1 **Geological Software**

##### **GeoCarta:**

A tool that allows you to search, analyze and visualize Oil & Gas data for mapping and analysis of Western Canadian well/log data. Includes an Engineering tools suite for production plotting, gas material balance and pool evaluation.

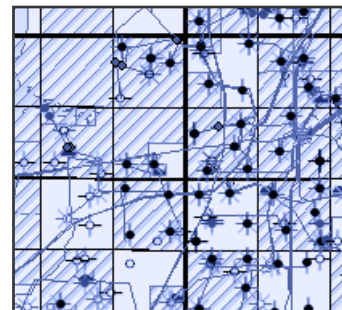

##### **CrossLog Suite:**

Efficiently view, print and interpret your scanned and digital well logs.

#### 2 **Exploration Datasets**

- Digital & Raster Well Logs
- Engineering Data
- Land Data
- Spatial Data
- Formation Tops & Limits
- Trade Seismic Data Layers

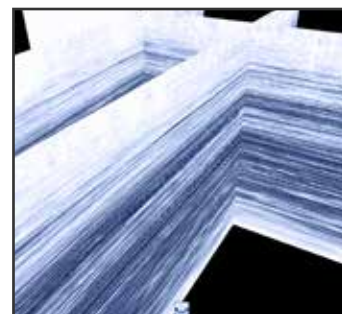

#### 3 **Geophysical Software**

##### **Glass:**

Seismic Interpretation made easy through user driven design. Enhanced workflows with industry leading line tying, mis-tie analysis and data modeling capabilities.

##### **Synthetic Suite:**

A powerful stratigraphic log modeling application with three integrated tools: 2D modeling, preparing and editing logs, and 1D seismograms.
