

Divestco

Seismic Data Sales Management

Watch your seismic move!

Go beyond the conventional methods of marketing seismic data with added-value features unmatched by our competitors.

The largest brokerage team in Canada coupled with a comprehensive suite of seismic products and services

Divestco acts as the marketing agent for your seismic data and as the liason between you and the brokerage community. The largest brokerage team in Canada coupled with a comprehensive suite of seismic products and services enable us to take a unique and innovative approach to the sale of seismic data.

Benefits:

- Increase your revenue from data sales
- Reduce your data management costs
- Create immediate and extensive exposure for your data in the marketplace with our existing customer base of more than 550 E&P companies
- Develop ongoing strategies to market your data

Exposure

Your data is highlighted as an available data layer in Divestco's basemapping application, MapQ. Interested purchasers can quality inspect and purchase your data by simply clicking on a line of interest which automatically submits a QI request to their Divestco broker. Your data is additionally featured in eBroker, Divestco's online seismic data request and management tool, providing you a direct channel to the marketplace.

Canada's Leading Geo-Services Company.
