

Divestco

# Seismic Data Loading Services

Have Confidence in the Accuracy and Accessibility of All Your Data Assets

*Divestco offers conversion services that enable us to convert other industry application projects to WinPICS, and output your 2D/3D data to CSEG and SEG-Y formats.*

Divestco's experienced technicians comprehensively and accurately load your 2D/3D SEG-Y Seismic, Grid, Well, Culture Data and all LAS Support Data Files ensuring that all the data loaded is usable and easily available to you.

Divestco offers conversion services that enable us to convert other industry application projects to WinPICS, and output your 2D/3D data to CSEG and SEG-Y formats. Your survey SEGP1 can be attached to your SEG-Y Headers and exported into a new SEG-Y file in cases where this information is missing from the original.
