Choose between a no obligation transactional account or save money with an annual subscription.

Comprehensive Log Library

EnerGISite is your most convenient source for online well and log data.

Gain instant access to:

- **Digital Logs and Digitizing Services** - Divestco offers the largest digitizing capacity in Canada with national coverage from coast to coast and millions of curves available instantly for download. Available for purchase or through subscription.
- **Scanned Logs** - Depth-registered tiff images are ready to use with Petra, Geographix and other applications. Available for purchase or through subscription.
- **Scanned Well Documents** - Access PDF files of DST's, completions, geological reports, fluid analysis and well reports of every description. Available through subscription.
- **Well Tickets** - EnerGISite well tickets feature production data, DST's, well summaries, formation tops and much more. Available through subscription.
- **Proprietary Curves** - Gain secure access to all of your private log curve data as well as to the millions of curves readily available in Divestco's digital curve library. Available through subscription.
- **Directional Survey Data** - Directional Survey Data for new and recently fracked horizontal wells in B.C., Alberta, Saskatchewan and Manitoba.

Convenient Searches

EnerGISite's simple yet powerful interface offers two convenient ways to access and retrieve well and log data:

1. **Detailed listings search** – **EnerGISite's** powerful well search tools enable you to perform detailed area or list searches and easily sort and filter large lists of wells and log types.
2. **GIS map selection** – **EnerGISite's** interactive map provides a convenient visual method of selecting wells and logs. Color-coded data types clearly identify the data types available for each well.
